

# AUSREO

Build with confidence

## AUSTRALIA'S FASTEST GROWING REBAR SUPPLIER

In 2000, our founding members saw an opportunity to do things differently in the steel reinforcement industry. They knew they could make a difference by providing customers with **exceptional service, innovative products**, and a **'can-do' attitude**.

With our founders, and second generation family members, still actively involved in the business, our **entrepreneurial spirit** is as strong as ever.

### CIVIL ENGINEERING AND INFRASTRUCTURE

We partner with major infrastructure builders to develop a **5D steel detailing model (BIM)** that **saves time and money** in the early stages of a project. Our proprietary owned software, **ADDA\***, enables us to identify and supply the optimal mix of stock bar, custom milled lengths, and prefabricated elements.

### COMMERCIAL BUILDING CONSTRUCTION

Our **experienced schedulers and high-capacity bar processing facilities** keep projects running on-time and to budget. We prefabricate pile cages, diaphragm walls, columns, beams, and tunnel / bridge elements to **accelerate your construction program**.

### RESIDENTIAL BUILDING CONSTRUCTION

We stock all the **steel mesh, bar, building accessories and tools** you need to construct a reinforced concrete slab and structure. Our friendly customer service team **respond quickly** to your requirements, offer helpful advice, and are happy to arrange **'special orders'** for those rare items you need.

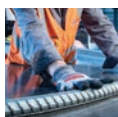

# TRADE SERVICE CENTRE NETWORK

AUSREO is a ONE STOP SHOP for concreters, builders and associated trades looking for friendly service, fast response, and a quality product range.

For more information, contact:

Everything a concreter needs to get the job done!
